

Asian Markets Currency Alpha Strategy

April 2019

As a leading, independent currency specialist, Mesirow Financial Currency Management has been delivering innovative, customized currency solutions to institutional clients globally since 1990.¹ Being a private, employee owned firm, Mesirow Financial is free from many conflicts of interest associated with bank-affiliated organizations or publicly held firms and is fully aligned with the interests of its clients.

Background and Investment Approach

The Asian Markets Currency Alpha Strategy commenced trading in February 2006 and aims to profit from short and medium term moves in the Asian markets' currency pairs. Depending on market conditions and volatility, the strategy combines two systematic components, based on technical and fundamental models, with a discretionary component. These comprise our Systematic Technical Strategy, Systematic Fundamental Strategy and our Market Information Strategy, respectively.

During periods of increasing or high volatility, our Systematic Technical Strategy uses a series of proprietary trading algorithms operating over multiple time frames. The algorithms combine trend continuation and trend reversal signals. During periods of declining or low volatility, our Systematic Fundamental Strategy reflects a predetermined set of positions designed to reflect 'market' views on the relative attractiveness of currencies versus the US dollar. Our proprietary Global Volatility Indicator² serves as the regime shifting mechanism within the two systematic strategies.

Our Market Information Strategy leverages the experience and global network of our portfolio managers and seeks to capture and exploit the behaviour of market participants that cannot be modeled. It has characteristics often associated with discretionary managers.

Mesirow Financial Currency Management believes that long run success is achieved through successful mitigation of downside risk at the portfolio, strategy, and individual trade levels. Daily CVaR limits are enforced at the aggregate portfolio and sub-strategy level. Left hand tail risk is monitored using a proprietary methodology grounded in Extreme Value Theory.

About Mesirow Financial

Founded in 1937, Mesirow Financial is a diversified financial services firm serving corporations, public and private pension plans, charitable organizations and individuals. We have approximately \$29.4 billion in assets under management and over \$88 billion in currency risk management assets.⁴

- 1 Track record for Currency Risk Management Overlay strategies prior to May 2004, the date that the Currency Risk Management team joined Mesirow Financial, occurred at prior firms. Track record for Currency Alpha and Macro strategies prior to October 1, 2018, the date that the Currency Alpha and Macro Strategies team joined Mesirow Financial, occurred at prior firms.
- 2 The GVI is an internal proprietary model utilizing one month at-the-money (ATM) volatility for G10 currencies, including crosses plus BIS liquidity report weightings.
- 3 The Asian Markets Currency Alpha Strategy (Asian Alpha Strategy) commenced trading in February 2006 as a carve-out from an institutional account. From February 2006 through December 2010 performance is based on an equal-weighted composite of all accounts invested in the Asian Alpha Strategy; from January 2011 performance is based on the asset weighted performance of all accounts invested in that strategy. Net returns are calculated using management fees of 2% per annum and performance fees of 20% per annum. Performance fees are accrued daily, paid quarterly and a high water mark is employed. Performance is in USD and all returns and statistics are based on monthly returns. The composite includes all fee paying accounts, including both commingled and managed accounts.
- 4 As of April 30, 2019. Estimated assets under management include outflows and inflows occurring on the 1st of the subsequent month. MFCM assets under management reflect assets under management of both the Currency Risk Management Division and Currency Alpha and Macro Strategies Division of MFCM. Currency Risk Management assets under management reflect the total foreign currency portfolio exposure of clients' underlying portfolios allocated to the Currency Division of Mesirow Financial. Currency Alpha and Macro Strategies assets under management reflect the clients' total investment amount in the Alpha and Macro strategies, which is calculated based on an annualized 2% volatility target.

Past performance is not an indication of future results. Actual results may be materially different from the results achieved historically.

Certain strategies discussed throughout the document are based on proprietary models of MFCM's or its affiliates. No representation is being made that any account will or is likely to achieve profits or losses similar to those referenced.

Performance pertaining to the Currency Alpha and Macro strategies may be stated gross of fees or net of fees. Performance information that is provided net of fees reflects the deduction of implied management and performance fees. Performance information that is provided gross of fees does not reflect the deduction of advisory fees. Client returns will be reduced by such fees and other expenses that may be incurred in the management of the account. Advisory fees are described in Part II of Form ADV of Mesirow Financial Investment Management, Inc. Simulated model performance information and results do not reflect actual trading or asset or fund advisory management and the results may not reflect the impact that material economic and market factors may have had, and can reflect the benefit of hindsight, on MFCM's decision-making if MFCM were actually managing client's money in the same manner. Performance referenced herein for Currency Alpha and Macro strategies prior to October 1, 2018, the date that the Currency Alpha and Macro Strategies team joined Mesirow Financial, occurred at prior firms. Any chart, graph, or formula should not be used by itself to make any trading or investment decision. Any currency selections referenced herein have been included to illustrate the market impact of certain currencies over specific time frames. The inclusion of these is not designed to convey that any past specific currency management decision by MFCM would have been profitable to any person. It should not be assumed that currency market movements in the future will repeat such patterns and/or be profitable or reflect the currency movements illustrated above.

Comparisons to any indices referenced herein are for illustrative purposes only and are not meant to imply that a strategy's returns or volatility will be similar to the indices. The strategy is compared to the indices because they are widely used performance benchmarks.
