<p>(a) an explanation of the relative importance the firm gave to the execution factors of price, costs, speed, likelihood of execution or any other consideration including qualitative factors when assessing the quality of execution;</p>	<p>In circumstances where trades fall inside the scope of best execution under MiFID, the ranking of the Execution Factors will typically be as follows:</p> <ul style="list-style-type: none"> • Price • Speed and/or likelihood of execution • The impact on market prices of executing an order or part of an order; • The availability of price improvement (the opportunity for an order to be executed at a better price than what is currently quoted publicly); and • Any other consideration relevant to the efficient execution of the order. <p>The remaining Execution Factors, beyond likelihood of settlement which forms the first filter for potential counterparties to a trade, such as costs, nature of the order and other considerations relevant to the efficient execution of Client transactions are generally given equal ranking.</p> <p>However, where Clients gave the Firm specific instructions as to how they require the transactions to be executed, the duty of best execution was limited to those matters which are not covered by specific instructions.</p>
